

GENERAL INFORMATION

Applications ADAM Quartz is ideal for a wide range of interior applications, including those subject to constant use, such as kitchen countertops, vanities, tub, shower surround, interior cladding, and furniture pieces.

ADAM Quartz is not suitable for exterior use, or any areas that are exposed to direct sunlight UV radiation or excessive heat over 300° F (150°C). Exterior application will void the warranty.

CARE AND MAINTENANCE

ADAM Quartz is non-porous and low maintenance, thorough cleaning with a damp cloth and mild detergent once a week is adequate to maintain the surface looking like new.

Stains or Spills Stubborn stains and dried spills can be easily removed with non-abrasive household cleaning supplies, such as Soft Scrub Liquid soap, damp cloths, sponges, and other non-abrasive pads. Anything a bit stickier can be quickly removed with a plastic putty knife.

Cleaning Products to Avoid Cleaning products with pH levels between 6 and 8 are the best choice for cleaning. Anything outside of this range can potentially damage your ADAM Quartz surface, but quickly neutralizing with water and wiping with a damp cloth is a quick and easy solution to harmful exposure.

Heat Resistance While ADAM Quartz is more heat resistant than other types of stone, such as granite, placing hot pads or trivets between hot cookware and your ADAM Quartz surface can prevent damage caused by rapid, extreme temperature fluctuations.

Tough, but easy to maintain Using cutting boards, hot pads, non-abrasive chemicals are easy ways to always keep your ADAM Quartz surface clean, shiny, and new.
